SAFETY DATA SHEET

SECTION I- PRODUCT AND COMPANY IDENTIFICATION

Product Number: 470
Product Name: Int/Ext Latex Block Filler
Use of Substance: Coating Masonry Substrates
Manufacturer's Name: Farrell-Calhoun Inc.
221 E. Carolina Ave.
Memphis, TN. 38126

Product Information: www.farrellcalhoun.com
Transportation Emergency *: (800) 424-9300 Chemtrec
Regulatory Information: (901) 526-2211

* for Chemical Emergency ONLY (spill, leak, fire, exposure or accident)

SECTION II- HAZARDS IDENTIFICATION

OSHA/HCS Status: This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200)

GHS Classification:

HEALTH
Mild Eye Irritation - Category 2B
Mild Skin Irritation - Category 3

ENVIRONMENT
No data available

PHYSICAL
Noncombustible - Category N/A

GHS LABEL:

Symbols: None Required

Hazard Statements
WARNING!
Causes eye irritation
Causes mild skin irritation

Precautionary Statements
Avoid breathing sanding dust/spray mist.
Use personal protective equipment as required.
Wash hands thoroughly after handling.
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing.
IF skin or eye irritation occurs: Get medical advice/attention.
Store container in well ventilated area. Keep container tightly closed.
Dispose of contents/container in accordance with local/regional/national laws.

Supplemental Label Elements: No data available

Hazard Not Otherwise Classified: None Known

% Mixture With Unknown Acute Toxicity: 2.0% of mixture consists of ingredient(s) of unknown toxicity

SECTION III- COMPOSITION / INFORMATION ON INGREDIENTS

Reportable Components | CAS Number | Vapor Pressure mmHg/Temp | % By Weight
--- | --- | --- | ---
Limestone | 1317-65-3 | | 40% - 50%
Kaolin | 1332-58-7 | | 10% - 20%

* Concentration ranges are due to batch variation and trade secrets

SECTION IV- FIRST AID MEASURES

Discription of First Aid Measures:

GENERAL: If symptoms persist, call a physician. Do not breathe dust/fume/gas/mist/vapors/spray. Do not get in eyes, on skin, or on clothing.
EYES: Flush eyes with large amounts of water for at least 15 minutes while holding eyelids apart. Remove contacts while flushing if present and easy to do. Get medical attention.
SKIN: Wash affected area thoroughly with soap and water. Remove contaminated clothing and launder before re-use. If skin irritation persists, call a physician.
INHALATION: If affected, remove from exposure. Restore breathing with mouth-to-mouth resuscitation while using a barrier to prevent exposure. Maintain an open airway. Get medical attention if irritation persists.
INGESTION: Rinse mouth. If symptoms persist call a physician. Do not induce vomiting. Call poison control or get medical attention immediately.

Protection for first responders: Use personal protective equipment as required, vapor respirator, gloves, and mask. No action shall be taken with personal risk or without suitable training.

Most Important Symptoms and Effects, Both Acute and Delayed:

Symptoms: No information available.
INDICATION OF IMMEDIATE MEDICAL ATTENTION AND SPECIAL TREATMENT NEEDED:

Note to Physician: Treat symptomatically. Contact poison treatment specialist immediately, if large quantities have been ingested or inhaled.

SECTION V: FIRE FIGHTING MEASURES

EXTINGUISHING MEDIA: Use foam, CO₂ or dry chemical
UNSUITABLE MEDIA: Use of water spray may be inefficient.

SPECIAL FIREFIGHTING PROCEDURES: Wear full protective equipment including self-contained breathing apparatus. Water spray may be ineffective. If water is used, fog nozzles are preferred. Water may be used to cool closed containers to prevent pressure build up and possible auto-ignition or explosion when exposed to extreme heat.

UNUSUAL FIRE AND EXPLOSION HAZARDS:
Material can splatter above 212° F. Dried product can burn. Closed containers may rupture due to build-up of pressure.

SECTION VI: ACCIDENTAL RELEASE

STEPS TO BE TAKEN IN CASE MATERIAL IS SPILLED OR RELEASED: Remove all sources of ignition. Ventilate the area. Dike around spill and absorb liquids with absorbent. Stop spill from entering drains, sewers, streams, or waterways. Area could be slippery. Wear resistant clothing while in affected area. Use non-sparking shovel for dried absorbent or wet vacuum to remove spill to appropriate labeled containers. Inform relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

SECTION VII: HANDLING AND STORAGE

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE: Do not store above 120° F, near heat, or open flame. Do not smoke in area! Protect from freezing. Close container and keep upright to prevent leakage.

OTHER PRECAUTIONS: Do not take internally. Avoid skin and eye contact. Prevent repeated or prolonged breathing of vapor or spray mist. Follow label precautions. KEEP AWAY FROM CHILDREN! Use NIOSH- approved dust filter respirators when sanding to keep the TLV below the applicable limits.

Other protective clothing or equipment, such as a properly fitted respirator (NIOSH approved) and proper containment and cleanup. For more information, contact the National Lead Information Center at 1-800-424-LEAD (in US) or contact your local health authority.

SECTION VIII: EXPOSURE CONTROLS AND PERSONAL PROTECTION

INGREDIENT PARAMETERS

OCCUPATIONAL EXPOSURE LIMITS

<table>

PRECAUTIONS TO BE TAKEN IN USE: Use with adequate ventilation. Avoid contact with eyes and skin. Avoid breathing vapor or spray mist. Wash hands thoroughly after use.

This coating may contain materials classified as nuisance particulates (listed as Dust in Section VIII) which may be present at hazardous levels only during sanding or abrading the dried film. If no specific dusts are listed in Section VIII, the applicable limits for nuisance dusts are ACGIH TLV 10 mg/M³ (total dust), 3 mg/M³ (respirable fraction), OSHA PEL 15 mg/M³ (total dust), 5 mg/M³ (respirable fraction).

Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (NIOSH approved) and proper containment and cleanup. For more information, contact the National Lead Information Center at 1-800-424-LEAD (in US) or contact your local health authority.

VENTILATION: Local exhaust preferable. General exhaust acceptable if the exposure to materials in Section VIII is maintained below applicable limits. Heavy vapors should be removed from all lower work areas. Refer to OSHA Standards 1910.94, 1910.107, 1910.108.

RESPIRATORY PROTECTION: If personal exposure cannot be controlled below applicable limits by ventilation, wear a properly fitted organic vapor/particulate respirator approved by NIOSH/MASHA for protection against materials in Section VIII. When sanding or abrading the dried film, wear a dust/mist respirator approved by NIOSH/MSHA for dust which may be generated from this product, underlying paint, or the abrasive.

PROTECTIVE GLOVES: Gloves should be worn if skin contact is likely. Use nitrile or rubber gloves to prevent skin contact.

EYE PROTECTION: Use safety eyewear including side shields, face shields, or chemical splash goggles (ANSI Z87.1, or approved equivalent).

OTHER PROTECTIVE CLOTHING OR EQUIPMENT: Use disposable or impervious clothing if work clothing contamination is likely. Use protective cream if skin contact is likely. Use full face shield, apron, or appropriate equipment. Availability of eye wash stations and showers recommended.

WORK/HYGIENIC PRACTICES: Wash hands before eating, smoking, or using wash room. Do not consume food or beverages where this product is handled.

**SECTION X- STABILITY AND REACTIVITY**

REACTIVITY: No data available
CHEMICAL STABILITY: Stable under ambient conditions.
CONDITIONS TO AVOID: Coagulation may occur following freezing, thawing, or boiling
INCOMPATIBILITY: Products will react violently with any water sensitive materials such as sulfuric acid or alkali
HAZARDOUS DECOMPOSITION OR BY-PRODUCTS: By fire: Carbon Dioxide, Carbon Monoxide
HAZARDOUS POLYMERIZATION: Will not occur

**SECTION XI- TOXICOLOGICAL INFORMATION**

Signs and Symptoms of Overexposure: Eye and nasal irritation, headache, dizziness, nausea, difficulty breathing, itching or burning skin.

ACUTE EFFECTS:
Eye Contact: May cause slight irritation, redness, tearing, stinging
Skin Contact: May cause drying (dermatitis), and cracking
Inhalation: May cause irritation, difficulty breathing
Ingestion: May cause irritation of the digestive tract, nausea

TARGET ORGAN EFFECTS: May cause gastrointestinal (oral), and respiratory tract effects

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: In some individuals with prior sensitivity, allergic reactions can occur.

CARCINOGENICITY:
- NTP CARCINOGEN: NO
- IARC CARCINOGEN: NO
- OSHA REGULATED: NO

CHRONIC HEALTH EFFECTS: No data available

SECTION XIII- DISPOSAL INFORMATION

DISPOSAL OF WASTES: Disposal should be in accordance with applicable regional, national and local laws and regulations. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. CONTAMINATED PACKAGING: Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. Do not reuse container. This material and container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues.

SECTION XIV- TRANSPORT INFORMATION

US GROUND DOT: Latex Paint (Not DOT Regulated)
MARINE POLLUTANT: NO
