

Wood Kraft Waterborne Wood Care Products

Farrell-Calhoun's line of Wood Kraft Waterborne products are formulated to beautify and protect. They offer the ease of application of a water-based product, without sacrificing the durability of a traditional oil-based product.

Our Wood Kraft Waterborne Penetrating Wiping Stains are premium pigmented oil modified, alkyd, waterborne dispersion wiping stains. These stains develop the natural beauty of both hard and soft woods without obscuring grain patterns and with minimal grain raising. The quick drying, penetrating action allows complete staining and finish coating of wood surfaces in a single day.

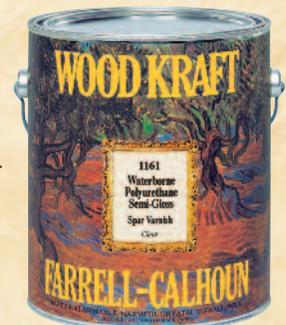

*1500 Waterborne
Pigmented Wiping Stain*

*1190 Waterborne
Polyurethane Interior*

Farrell-Calhoun's Wood Kraft Interior Waterborne Acrylic-Polyurethane Varnishes and Wood Kraft Interior/Exterior Acrylic-Polyurethane Spar Varnishes are clear, non-yellowing coatings formulated to produce hard, durable finishes that feature excellent abrasion resistance and offer protection from water, alcohol, and most household chemicals. These varnishes are low odor and dry quickly, allowing multiple coats to be applied in the same day. Wood Kraft Interior/Exterior Spar Varnishes have superior UV-A and UV-B absorption to protect the surface from harmful rays of the sun.

Wood Kraft Waterborne Acrylic-Polyurethane Varnishes are recommended for properly prepared wood surfaces such as paneling, furniture, doors, cabinetry, and woodwork. Available in Gloss, Semi-Gloss, and Satin sheens.

*1160 Waterborne
Polyurethane Spar Varnish*
